Portfolio Committee:

Please accept this letter as completion of my Learning Systems Technology Education portfolio for graduation with my Masters in Education. My portfolio is hosted on UALR's server at www.ualr.edu/cahenlsee/chid. A [ZIP](#) file containing all of my portfolio files can be downloaded by clicking the 'Program Files' button located under the 'Portfolio Committee' page. You will also find a table based off of the AECT standards with the indicators marked by the corresponding course number and linked to the appropriate artifact's page.

All artifacts chosen for inclusion within my portfolio were thoroughly reviewed and revised to ensure they all meet the highest standards of professionalism and that the committee is given a full representation of my time spent within the program. I have chosen 9 artifacts to include that represent seven LSTE courses and two EDFN courses. I have also provided a link in the site menu to the WordPress blog that I created when I began the program to give additional insight into the progression of my skills and understanding of the principles and theories covered in the LSTE program's curriculum.

I feel that this portfolio thoroughly covers my progress while participating in the LSTE program and that it reflects a massive growth in my understanding of the different learning processes by which we must operate to be effective practitioners of instructional design. This understanding is even evident within the website I designed to host my portfolio. The design of my website takes into account the many different principles of multimedia learning and human technology interaction by ensuring that it is functional across traditional computers, tablets and smartphones. I also utilize a very streamline aesthetic with large fonts, buttons and no extraneous graphics, audio or words to ensure that visitors are focused on the content rather than the design of the portfolio.

I appreciate the portfolio committee's time and I welcome your honest critique. I have had a wonderful time while participating in the LSTE Masters of Education program here at the University of Arkansas at Little Rock and am looking forward to expanding my skills and understand further as I advance my career in higher education.

Sincerely,

Cody Adam Henslee
